

Northamptonshire Activity on Referral Scheme Referral Criteria

Patients are only eligible for referral if they are over 16 years of age, living a sedentary lifestyle and meet the requirements of the scheme referral criteria outlined below:

Low Risk Populations	
Cardiac Disease Prevention	People with family history of heart disease but no current symptoms or other risk factors
Cholesterol	People with a Q [®] Risk Score > 10%
Stress/Depression	Mild to moderate sufferers.
Pre-diabetes / Diabetics Type II	With a fasting glucose level of 5.5–6.9 mmol/l or an HbA1c level of 42–47 mmol/mol (6.0–6.4%). Type II who are controlled through dietary restriction alone
Impaired strength or mobility / Osteoarthritis / Osteoporosis	Providing the condition is not so far advanced that there is a risk of fracture
Obesity	BMI >30 or >28 with co-morbidities
Smokers Attempting to Quit	Providing there are no CHD risk factors or symptoms of impairing respiratory function
Back Pain	Chronic
Medium Risk Populations	
Asthmatics	Controlled and stable. Must carry an inhaler when exercising
Cystic Fibrosis	Low – moderate symptoms
Diabetes Type I and II	Who are on drug therapy and their condition is stable
Hypertensives	Controlled <160/100mmhg
Neurological Conditions	Static neurological conditions such as Parkinson's Disease or Multiple Sclerosis
Severe Depression	If they have a carer or support worker they are required to attend with a patient
Fibromyalgia	History given

High Risk Populations	
Surgical Preparation/Recovery	Pre and post-operative hip/knee replacements and general surgery, NOT cardiac. Guidance from Physiotherapist of contra-indicated exercise.
COPD/ Pulmonary related	Disease stable and controlled
Intermittent Claudication	Providing there are no symptoms of cardiac dysfunction or any previous history of M.I or CABG
Stable Angina	Stable angina for at least 6months with no evidence of pain at rest. The patient must be assessed by the local scheme co-ordinator. (No history of M.I or bypass)
Valvular Heart Disease	No history of M.I or bypass. Full medical history to be given
Arrhythmias	Must be on medication and stable.
Coronary Surgery Rehabilitation	Should have attended phase 3 post event or attended phase 4
Angioplasty/M.I/Bypass	1 year post event
Stroke	Stable and cleared to exercise by the healthcare professional
Head/Brain Injury	Stable and cleared to exercise by healthcare professional. The patient will be assessed on the complexity of the injury and whether they are able exercise independently.

Please Note: If you wish to refer a patient under the criteria for “High Risk Population” please contact the Scheme Coordinator at the preferred site in the first instance. The conditions listed can only be accepted if the exercise professional at the AoR site has the specialist training and knowledge within that field.

Acceptance of other health conditions

Patients with the following conditions can only be accepted at the sites indicated due to the specialist training required by the exercise professionals.

Condition	Sites
<p>Cancer: The AoR Scheme excludes patients who are receiving treatment for cancer. The scheme will only accept patients who have been in remission for over 6months.</p> <p>However, the sites opposite do have trained exercise professionals in this area and therefore will accept referrals to their facilities. A referral must be made by the patients Oncology Specialist before any type of exercise programme is commenced.</p>	<ul style="list-style-type: none"> • The Nene Centre, Thrapston • The Pemberton Centre, Rushden
